

Do you have a psd layout and you want to convert into a full working Joomla template? Let us help you!!!!

We can take your psd layout, slice it and code it with css and php into a Joomla Template in just a few days.

Our Psd to Joomla service consists the following tasks:

1. Slice psd template as needed
2. Code new Joomla css files according to slices
3. Code index.php file using css features
4. Add Joomla modules with collapsible mode
5. Add SEO capabilities inside css and template files(h1, h2 and image alt tags)
6. Clean up messy code using mark up tools
7. Validate all Joomla template files for css and w3c validation
